

Biometric IC Color Coater / Finger ID Reader Color Coater

Creating Nano's color coater is suitable for a non-uniform compound spray, such as fluorescent powder, ink and any nano particles.

Product Features

- High precision mass flow controller
- A proper flow designed spray chamber that reduces dust pollution
- Auto cleaning process
- A novel system with both mass flow control and recycling systems is applied for suspension delivery.

Fields of Industrial Applications

Biometric IC, PCB, phone or laptop cover.

Specification

Feed method	Semi-Batch
Effective area	750mm×900mm(max.)
Coating thickness	0-30um
Uniformity	±10%
Hardness	>7H
